Villeurbanne, February 9, 2022

CALY Technologies is a fables company supplying Off-the-shell and Custom Specific Silicon Carbide (SiC) Devices and Design Services. Our goal is to be a leader in the SiC semiconductor device arena for Protection and Power Conversion applications for Harsh Environments while complying with product reliability and environmental standards.

Certified ISO9001:2015, CALY technologies company commits to comply with all partner applicable requirements. All parties at CALY Technologies focus on best customer interest including timely delivery, state-of-the-art and diligent support level, a thorough attention to meet customer's expectations while permanently seeking for improvements of our products and services.

Our above commitments belong to our Management Program with explicit Quality Objectives set through four different challenge areas: Governance & Economics, Social, Trade & Production and Environmental. These four cornerstones drive our daily actions.

CALY Technologies Top Management commits to involve all needed means to ensure the effectiveness and continuous improvement of our Quality Management System, reach our Quality Objectives and meet all our stakeholders' satisfaction.
